**“Heart attack patients  
do best at Englewood.”**

## **We're #3 in the U.S. for heart attack survival.**

“Patients at Englewood Hospital and Medical Center had a better chance of surviving a heart attack than at any other hospital in New Jersey in the latest information available from the government...” – *The Record*, 8/23/08

The one month survival data\* is the most important measure of quality care for our patients and reflects the exemplary skills of our entire cardiac team. From our highly qualified paramedics and Emergency Department experts who recognize critical signs, to our exceptional interventionalists, cardiologists, nurses, and catheterization lab staff, we provide the highest level of heart care.

For a referral to one of our outstanding heart doctors *before* your heart emergency, call **201.894.3456**. For more information, visit [bestheartdocs.com](http://bestheartdocs.com).

*At Englewood Hospital, top doctors are just a heartbeat away.*
